# DEVENDER SINGH

Software Engineer
+91 8698185324 | shaktawatdevendra17@gmail.com | github.com/Devender1703

## SUMMARY

Software developer with over 4 years of experience, most recently at **Rubrik**, a leading data security company. Core skills in backend development, DevOps and microservices. Previously at Commvault; also an open source contributor at Apertus in Google Summer of Code 2019.

## SKILLS

**Backend:** Go, C/C++, Python
**DevOps:** Azure, Docker, Kubernetes, CI/CD
**Database:** Microsoft SQL Server, MongoDB
**Testing:** Jest, Unit/Functional Testing
**Tools:** Git, Swagger, CMake

## WORK EXPERIENCE

### Software Engineer, Rubrik
*Bengaluru, India | Nov 2024 - Sep 2026*

- **Multi-cluster RBA support** for Windows volume groups, connecting multiple **CDM clusters** to a single Windows workload host.
- **Metadata Sync & CDC Unification (MCU)** for Windows volume groups, syncing metadata in the **CDM database (CockroachDB)** to the cloud-based **RSC database (MySQL)**.
- **IPv6 support for Hyper-V** for **Meta**, enabling workload management over **IPv6** via Rubrik.
- Designed and delivered **SCVMM-to-Rubrik Security Cloud** metadata integration for **Hyper-V, mapping SCVMM VM tags** to **native system tags** to automate **SLA and hierarchy management** at scale for **50K+ VMs**.

### Senior Software Engineer, Commvault
*Bengaluru, India | May 2021 - Nov 2024*

- **Managed production workloads** for Fortune 500 clients (e.g., **Nike, Shell**) using **Azure NetApp Files** for enterprise-grade storage management.
- **Engineered a replication framework** for **Pure Storage FlashArray**, enabling automated snapshot distribution across multiple secondary sites using native hardware technology.
- **Led migration** of the IntelliSnap core feature from Java Swing to a **React.js** web application, improving UI/UX and reducing customer complaints by **40%**.
- **Developed RESTful APIs** adhering to **OpenAPI standards** to streamline snapshot backup management and ensure scalable service integration.
- **Architected a multi-tenant permission model** for secure, isolated management of on-premise storage entities for enterprise clients.
- **Provided Tier-3 technical resolution** for complex customer issues involving Pure Storage FlashArray integration and Command Center web functionality.

### Intern, Commvault
*Bengaluru, India | Nov 2020 - Apr 2021*

- Developed a suite of reports using **SQL scripts** and Commvault's report framework to extract and analyze data from **50+ customer databases**, giving insight into customer utilization of **IntelliSnap** features.

### Open Source Contributor, GSoC 2019 - Apertus
*Remote | Apr 2019 - Jul 2019*

- **OpenCine** (raw image processing tool): designed and developed a C++ utility converting **.raw12** files to **.avi** by restructuring the internal file architecture.
- Integrated into **Apertus** OpenCine, enabling seamless processing and frameserving of unsupported raw12 files to third-party players like **VLC media player**.

## EDUCATION

**B.E. Computer Science, Army Institute of Technology, Pune** *May 2017 - May 2021*

**High School (Science), Kendriya Vidyalaya, Kota** *May 2015 - May 2017*
